Project Design Phase
Solution Architecture

Date	16 February 2026
Team ID	LTVIP2026TMIDS48526
Project Name	Rising Waters – A Machine Learning Approach to Flood Prediction
Maximum Marks	4 Marks

Solution Architecture:

Solution architecture for the *Rising Waters* project bridges the gap between real-world flood management challenges and an intelligent Machine Learning-based technological solution. It defines how environmental data, predictive analytics, and alert mechanisms are integrated into a unified system to support early warning and disaster response.
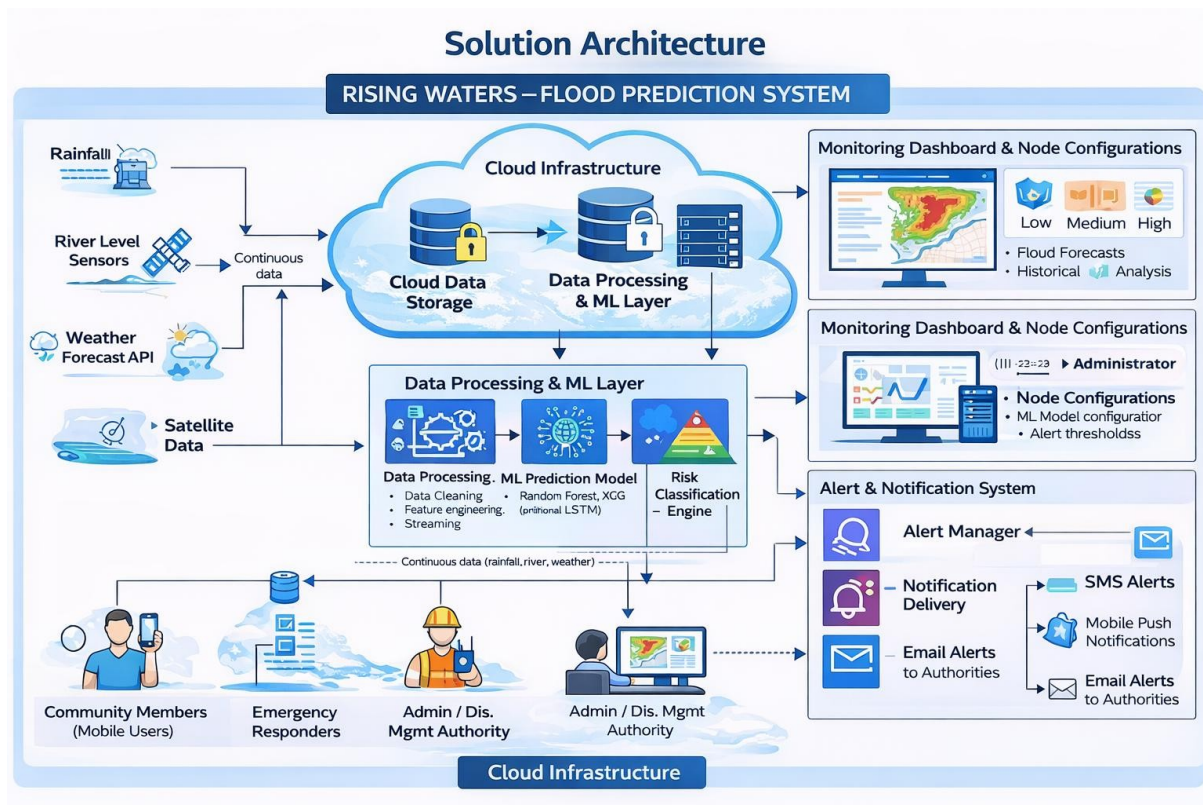

Example - Solution Architecture Diagram:
